

Junior Integration Developer

Technology is literally changing the world around us and yes, some people tend to focus on why that change is bad – it makes us uncomfortable, it breaks our status quo, it feeds our uncertainty – but at Orchard we choose to see it differently. Technology can make lives better. It can make businesses better, brands better and experiences better. It can be the change we want to see in the world.

Which is why we, at Orchard, rally around a single purpose: to *invent better outcomes* through creativity and technology. Those better outcomes can only exist in the context of people irrespective of if we label them users, customers, patients, clients or even staff.

Join a dynamic and growing creative technology agency

Based in Pymont, Sydney and New York

Working with blue chip global brands.

The Opportunity

We're currently on the lookout for a talented and ambitious Account Director with awesome digital experience to work in our Consumer Account Management team. Specifically, on an automotive client investing heavily to get to no.2 in the market.

Orchard offers a great working environment, all the frills and perks you'd expect from an agency and the necessary support & structured training you need to become a rock star digital guru.

Key Function

The Junior ASP.NET Developer is responsible for developing the backend components of websites and web based applications. They are responsible for implementing content management, application functionality and integration requirements. The Junior ASP.NET Developer will work closely with the team to ensure that all code developed is clean, consistent, accurate and meets the definition of done.

Specific Duties

- Implementation of Content Management functionality
- Implementation of application functionality through bespoke development in .NET Framework 3.5-4.5, ASP.Net MVC, SQL Server and the use of Orchard's Framework.
- Development of APIs using WebAPI to expose complex data structures through business logic.
- Development of client side functionality using JavaScript & jQuery.
- Code to Orchard's development standards of;
 - C# source code
 - Object oriented with minimal code duplication.
 - Development of generic, reusable code where possible and integration to the Orchard ASP.NET framework.
 - Output of standards compliant (CSS2+ & HTML5) and accessible (Priority 1+) HTML
- Perform maintenance tasks on existing websites
- Comment and document code where appropriate

- Knowledge of industry best practices, coding / accessibility standards
- Fair understanding of source control solutions like Git, continuous integration, peer-review, and development methodologies such as agile / scrum and iterative-waterfall
- Good communication skills
- Holding a relevant IT degree / qualification
- Permission to work permanently in Australia

A little about Orchard

We are a full service digital creative agency who fuse art and technology to invent better outcomes for business and brands. We work with a number of leading client brands such as Electrolux, Asaleo, BT, Hyundai, Zoetis and Bayer to name a few.

Invent Better are two little words that define our big approach. It's a belief that creative technology solutions are the key to winning in today's digital age, and it's a formula that challenges us to engage with our clients in a way that encourages us all to push that little bit further every time.

It's this passion and approach that has made us one of Australia's largest digital marketing agencies.
